THEIR LIVES IN PERIL.

Over Two Thousand People at Work in a Death Trap.

ANY DAY MAY SEE A BIG DISASTER.

Fire and Collapse Threaten the Government Printing Office.

Attention Has Been Called to the Dangerous Condition of the Building for Years Past, but No Action Has Been Taken to Provide a Safer One.

Two thousand five hundred men and women, working for the largest and wealthiest employer in the country, are forced to take their lives in their hands every time they enter the building where their daily work is performed.

It is a gigantic death trap, which may be sprung at any moment and cause one of the greatest disasters of the age.

The employer of these people whose lives are jeoparded during all their working hours is aware of their danger. His attention has been called to it time and again, yet no real effort is made to insure their safety.

This employer so calls as to the peril of the people who work for him in Uncle Sam. The death trap is the Government Printing Office.

For years past the Public Printers, the employees under them, the members of the Congress and the public, have been pointing out the dangerous condition of the building, and the newspapers have been pointing out how not only wholly inadequate but how dangerous is the ramshackle old building, which now contains the greatest printing office in the world.

Their appeals have, however, been in vain. Patches have been put in here, props there, an occasional lean to be built, in this make-shift manner the continued use of the building has been made possible.

So persistent has been the neglect of the Government to the appeals in behalf of the safety of the Printing Office employees, that the latter have at last had hope of a change for the better and were becoming apathetic to their danger, when an incident occurred the other day which might have resulted in the building's collapse. The largest and most important of the buildings on the grounds, which were being repaired, was struck by lightning. The lightning struck the building, and the building was struck by lightning. The lightning struck the building, and the building was struck by lightning.

The building is supplied with electric fire-alarms, operated by the breaking of a piece of glass on the face of each one. One accidentally broke the other day and an alarm sounded throughout the building. Fortunately, this happened at noon, when most of the employees were out at lunch.

A number of the employees who remained in the building were for a short time a wild panic. Women shrieked and fainted, men flew wildly and aimlessly to and fro, and even some of the police officers were thrown into confusion.

BIG MONOPOLY IN SEALS.

Government Giving Away Citizens of the Seas to Land Pirates.

GREAT PROFITS IN ALASKAN FURS.

Hope of Stopping the Seal With Senator Plumb's Bill.

Have Senators Sherman and Hawley Stock in the Seal Company?—What the Government is Doing to Stop the Seal Trade.

"The farming out of so vast an enterprise as the Seal Islands by our Government to a private company is a national disgrace, a measure opposed to common public sentiment and one which I, as an Alaskan interested in the territorial development, must protest against."

There was no mistaking the estimate in which the Alaska Commercial Company is held by Hon. Minner W. Bruce, now in Washington as representative of the business men of Alaska. His unequivocal statements and opinions were called out by a casual reference to the proposed renewal of the lease, a contract which will be ratified on the 23d of February, unless the bill proposed by Senator Plumb is acted upon, or a joint resolution is passed by both houses providing for the immediate cessation of the trade.

"I am amazed," continued Mr. Bruce, "that the Government of the United States will become a party to such a gigantic scheme of private parties. I cannot comprehend by what means coerced, or by what considerations restrained from creditable legislation."

"Why has no other company made so bold to dislodge the Commercial Company?"

"Because it is useless. It was obtained twenty years ago by fraud, and refused to higher bidders. After that had been passed by Congress the Secretary of the Interior, Mr. E. A. Mearns, closed the lease himself, but gave it over to an inferior officer. After twenty years of monopoly the company still holds the Government in an iron grasp."

There is in the United States a large number of millions that are prepared to bid on the lease for 1890, but by recent investigation and thorough reliable advice, the project has been abandoned.

"Then you have theories, Mr. Bruce, as to the methods employed by this company in maintaining its supremacy for twenty years, in defiance of public sentiment?"

"Theories are not arguments," replied Mr. Bruce.

"Do you know whether or not Senators Sherman and Hawley have stock in this company, which pays 900 per cent?"

"I am not prepared to make any statements concerning the business investments of United States Senators, nor am I inclined to enter into the question of public charges, nor am I prepared to enter into the question of public charges, nor am I prepared to enter into the question of public charges."
